Mark Ko

Principal Consultant at MK Consulting

New York, New York, United States

Experience

MK Consulting

Principal Consultant

January 2012 - Present (14 years 8 months)

Seoul, Korea

ICT, M&A & Investment Consulting

- Provide Cloud services (infrastructure, billing, payment gateway, Big Data analytics, etc.) to small-to-medium sized website and game development companies.
- Provide implementation of best practice IT solutions–Payment & Clearance, Electronic ID, AFC (Automatic Fare Collection), RFID, IPTV Settop Box, Deep learning, etc.
- Architected and deployed Cloud services (infrastructure, development platform, Big Data analytics, etc.) to small-to-medium sized companies in various industries.
- Worked on an Image Recognition project that uses AI Deep Learning's Convolutional Neural Network technology to recognize prohibited items like weapons or explosives while bags are passed through x-ray security gates.
- Worked on a Digital Oilfield BigData project for energy companies where vast amount of geological data are quickly analyzed using Hadoop and NoSQL solutions, greatly shortening oil exploration time, thus contributing to cost savings.
- Planned and executed a Nationwide Payment Clearinghouse (for small payments) Consolidation project for Philippines government with the backing and support of Samsung SDS, Samsung C&T and KFTC (Korea Financial Telecommunications & Clearings Institute) on Korea side and Central Bank and top 5 banks on Philippines side.

Samsung SDS

Direcotr of Marketing

September 2002 - January 2012 (9 years 5 months)

Seoul, Korea

Business Development & Strategic Alliances

- Led the strategic collaboration between Samsung Group and Sun Microsystem to plan and launch HPC (High Performance Computing) Service based on Sun's grid computing technology, which later evolved to Cloud Business Unit in Samsung SDS.
- Planned and launched new services based on emerging technology–Data Center Services, Government Certified Digital Archives, Storage Service, and Desktop Management Service, etc.
- Launched Samsung's mobile B2B business, which involved building a mobile cloud center in New Jersey, through which enterprises have their back-end applications–CRM, ERP, SCM, etc. –mobilized for sales people, field personnel and executives.
- Launched Samsung's mobile B2C business through global strategic alliances with 350 carriers. Samsung Electronics sold smartphones loaded with SDS' integrated messaging solution, called Social Hub, out of NOC (Network Operation Center) in Frankfurt, Germany.
- Made strategic alliances with leading global IT companies such as IBM, Intel, Oracle, Sun Microsystems, SAP, Sybase, Symantec, EMC, etc.

IBM
Senior Systems Integrator
November 1995 - May 2000 (4 years 7 months)
Connecticut, USA

Senior Systems Integrator

- Worked as a founding member of the Transition Team of then newly created Strategic Outsourcing division in IBM GS, and contributed to the successful delivery of the first customer, Volvo Cars, and following largest customers in North America—Lucent Technology, Chase Manhattan Bank, Kodak, Campbell Soup, Equitable, ComEnergy, etc.
- Transition Team designed and implemented the remote management environment in Southbury datacenter using various management tools–Tivoli, Netview, MetaFrame, etc. –and handed over the management environment to Steady State (Operation) Team.

Education

University of Southern California

B.S. Electrical Engineering, Graduated with honor, Received a computer engineering certificate for additional focus on computer science courses. · (1983 - 1987)

High School
